

**Gastrointestinal Pharmacology Section
Activity Report March 14, 2011**

In early February we had a short IUPHAR GI Pharmacology leadership meeting in Vienna where we laid out a plan for expansion, especially involving more members. As an outcome, I contacted FASEB to organize a short informal business, town-hall type meeting at the Experimental Biology meeting in Washington DC in April for our section. I received notification that this has been set up for Sunday, 4/10, 5-6 PM in the Grand Hyatt. I am working on a similar arrangement for the largest GI meeting in the world, the annual Digestive Disease Week in early May in Chicago. I will let you know when this is finalized.

Sandor Szabo, MD, PhD, MPH
Chair, Gastrointestinal Pharmacology Section
