To : members of the IUPHAR Nominations Committee

Motivation letter

Dear Members of the IUPHAR Nominations Committee,

I would like to apply to the position of IUPHAR Treasurer for the next term.

As my track record shows, I have been engaged in national and international associations of pharmacology for many years, with a strong will to foster our discipline in all its dimensions: basic and translational pharmacological research, laboratory pharmacology (therapeutic drug monitoring), and clinical pharmacology.

This is what I have been doing locally in my home town of Limoges, where I chair a Department of pharmacology, toxicology and pharmacovigilance at the University Hospital, as well as a research team entitled "Pharmacology & Transplantation".

This is also what I did when I chaired the International Association of Therapeutic Drug Monitoring and Clinical Toxicology (IATMDC) and am doing now as chair of the European Association of Clinical Pharmacology and Therapeutics (EACPT): favouring connexions between pharmacologists and pharmacological societies, encouraging early career pharmacologists and fostering our discipline visibility towards academic institutions, governments and the larger public.

Since IUPHAR is the umbrella association of all pharmacological societies, I would really like to actively participate in its activities. After phone calls with IUPHAR president and secretary, I feel I could be of use in the important position of Treasurer. Although I will still be chairing EACPT until June 2023, I commit to dedicate the time and energy required for the Treasurer's activities, as well as to actively participate in the works and reflexions of the IUPHAR Executive Committee.

Sincerely,

Prof. Pierre Marquet, MD, PhD
